The first of these is the *Journal of the American Medical Association* (JAMA), which has been the most influential of the medical journals in the United States since its founding in 1883. It is a weekly publication, and its content is primarily focused on the latest research and clinical practice in the field of medicine. The journal is published by the American Medical Association, which is a professional organization of physicians in the United States. The journal is known for its high standards of quality and its commitment to providing its readers with the most up-to-date and accurate information available in the field of medicine.

The second of these journals is the *New England Journal of Medicine* (NEJM), which is a weekly publication that is also highly influential in the field of medicine. It is published by the Massachusetts Medical Society, which is a professional organization of physicians in the state of Massachusetts. The journal is known for its high standards of quality and its commitment to providing its readers with the most up-to-date and accurate information available in the field of medicine.

The third of these journals is the *Lancet*, which is a weekly publication that is also highly influential in the field of medicine. It is published by the British Medical Association, which is a professional organization of physicians in the United Kingdom. The journal is known for its high standards of quality and its commitment to providing its readers with the most up-to-date and accurate information available in the field of medicine.

These three journals are the most influential of the medical journals in the United States, and they are all known for their high standards of quality and their commitment to providing their readers with the most up-to-date and accurate information available in the field of medicine.
